(Emotion Regulation Worksheets 2–4a, 16)

Overview:
Understanding and Naming Emotions

WHAT EMOTIONS DO FOR YOU
There are reasons why we have emotions.
We need them!

FACTORS THAT MAKE REGULATING EMOTIONS HARD
Lack of skills, reinforcing consequences, moodiness, rumination/worrying, myths about emotions, and biology can interfere with changing emotions.

A MODEL FOR DESCRIBING EMOTIONS
Emotions are complex responses.
Changing any part of the system can change the entire response.

WAYS TO DESCRIBE EMOTIONS
Learning to observe, describe, and name your emotion can help you regulate your emotions.
What Emotions Do for You

EMOTIONS MOTivate (AND ORGANIZE) US FOR ACTION

• Emotions motivate our behavior. Emotions prepare us for action. The action urge of specific emotions is often “hard-wired” in biology.

• Emotions save time in getting us to act in important situations. Emotions can be especially important when we don’t have time to think things through.

• Strong emotions help us overcome obstacles—in our minds and in the environment.

EMOTIONS COMMunicate TO (AND INFLUENCE) OTHERS

• Facial expressions are hard-wired aspects of emotions. Facial expressions communicate faster than words.

• Our body language and voice tone can also be hard-wired. Like it or not, they also communicate our emotions to others.

• When it is important to communicate to others, or send them a message, it can be very hard to change our emotions.

• Whether we intend it or not, our communication of emotions influences others.

EMOTIONS COMMunicate TO OURSELVES

• Emotional reactions can give us important information about a situation. Emotions can be signals or alarms that something is happening.

• Gut feelings can be like intuition—a response to something important about the situation. This can be helpful if our emotions get us to check out the facts.

• Caution: Sometimes we treat emotions as if they are facts about the world: The stronger the emotion, the stronger our belief that the emotion is based on fact. (Examples: “If I feel unsure, I am incompetent,” “If I get lonely when left alone, I shouldn’t be left alone,” “If I feel confident about something, it is right,” “If I’m afraid, there must be danger,” “I love him, so he must be OK.”)

• If we assume that our emotions represent facts about the world, we may use them to justify our thoughts or our actions. This can be trouble if our emotions get us to ignore the facts.
What Makes It Hard to Regulate Your Emotions

**BIOLOGY**

- Biological factors can make emotion regulation harder.

**LACK OF SKILL**

- You don’t know what to do to regulate your emotions.

**REINFORCEMENT OF EMOTIONAL BEHAVIOR**

- Your environment reinforces you when you are highly emotional.

**MOODINESS**

- Your current mood controls what you do instead of your Wise Mind.
- You don’t really want to put in time and effort to regulate your emotions.

**EMOTIONAL OVERLOAD**

- High emotional arousal causes you to reach a skills breakdown point.
- You can’t follow skills instructions or figure out what to do.

**EMOTION MYTHS**

- Myths (e.g., mistaken beliefs) about emotions get in the way of your ability to regulate emotions.
- Myths that emotions are bad or weak lead to avoiding emotions.
- Myths that extreme emotions are necessary or are part of who you are keep you from trying to regulate your emotions.

Handouts for Changing Emotional Responses
Overview:
Changing Emotional Responses

CHECK THE FACTS

Check out whether your emotional reactions fit the facts of the situation.

Changing your beliefs and assumptions to fit the facts can help you change your emotional reactions to situations.

OPPOSITE ACTION

When your emotions do not fit the facts, or when acting on your emotions is not effective, acting opposite (all the way) will change your emotional reactions.

PROBLEM SOLVING

When the facts themselves are the problem, solving the problem will reduce the frequency of negative emotions.
EMOTION REGULATION HANDOUT 8
(Emotion Regulation Worksheet 5)

Check the Facts

FACTS
Many emotions and actions are set off by our thoughts and interpretations of events, not by the events themselves.

Event → Thoughts → Emotions

Our emotions can also have a big effect on our thoughts about events.

Event → Emotion → Thoughts

Examining our thoughts and checking the facts can help us change our emotions.

HOW TO CHECK THE FACTS

1. Ask: What is the emotion I want to change?
   (See Emotion Regulation Handout 6: Ways of Describing Emotions.)

2. Ask: What is the event prompting my emotion?
   Describe the facts that you observed through your senses.
   Challenge judgments, absolutes, and black-and-white descriptions.
   (See Mindfulness Handout 4: Taking Hold of Your Mind: “What” Skills.)

3. Ask: What are my interpretations, thoughts, and assumptions about the event?
   Think of other possible interpretations.
   Practice looking at all sides of a situation and all points of view.
   Test your interpretations and assumptions to see if they fit the facts.

4. Ask: Am I assuming a threat?
   Label the threat.
   Assess the probability that the threatening event will really occur.
   Think of as many other possible outcomes as you can.

5. Ask: What’s the catastrophe?
   Imagine the catastrophe really occurring.
   Imagine coping well with a catastrophe (through problem solving, coping ahead, or radical acceptance).

6. Ask: Does my emotion and/or its intensity fit the actual facts?
   Check out facts that fit each emotion.
   Ask Wise Mind.
   (See Emotion Regulation Handout 11: Figuring Out Opposite Actions, and Emotion Regulation Handout 13: Reviewing Problem Solving and Opposite Action.)

Opposite Action and Problem Solving: Deciding Which to Use

Opposite action = Acting opposite to an emotion's action urge

Problem solving = Avoiding or changing (solving) a problem event

---

**Flowchart: Opposite Action and Problem Solving**

1. **Ask:** Does this emotion fit the facts?
   - Yes: Check the facts
   - No: Proceed to next step

2. **Ask:** Is acting on this emotion effective?
   - Yes: Proceed to next step
   - No: Continue with opposite action

3. **Act on opposite action (Emotion Regulation Handouts 10–11)**
   - Do not act on emotion/action urge
   - Consider opposite action

4. **Problem-solve unwanted emotions (Emotion Regulation Handout 12)**
   - Be mindful of current emotions
   - Do not act on emotion/action urge
   - Change thoughts to fit the facts
   - Act, but accept the consequences gracefully

---

Opposite Action

Use opposite action when your emotions do NOT fit the facts or when acting on your emotions is NOT effective.

EVERY EMOTION HAS AN ACTION URGE.

CHANGE THE EMOTION BY ACTING OPPOSITE TO ITS ACTION URGE.

Consider these examples:

<table>
<thead>
<tr>
<th>EMOTION</th>
<th>ACTION URGE</th>
<th>OPPOSITE ACTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fear</td>
<td>Run away/avoid</td>
<td>Approach/don’t avoid</td>

<td>Attack</td>
<td>Gently avoid/be a little nice</td>
</tr>
<tr>
<td>Sadness</td>
<td>Withdraw/isolate</td>
<td>Get active</td>
</tr>
<tr>
<td>Shame</td>
<td>Hide/avoid</td>
<td>Tell the secret to people who will accept it</td>
</tr>
</tbody>
</table>

HOW TO DO OPPOSITE ACTION, STEP BY STEP

Step 1. IDENTIFY AND NAME THE EMOTION you want to change.

Step 7. EVALUATE the results of using the solution.

It worked? YEA!!! It didn’t work? Go back to STEP 5 and choose a new solution to try.

Accumulating Positive Emotions: Long Term

Accumulate positive emotions in the long term to build a “life worth living.”

That is, make changes in your life so that positive events will occur in the future.

Step 1. Avoid avoiding.
Start now to do what is needed to build the life you want. If you are not sure about what to do, follow the steps below.

Step 2. Identify values that are important to you.
ASK: What values are really important to me in my life?
Examples: Be productive; be part of a group; treat others well; be physically fit.

Step 3. Identify one value to work on now.
ASK: What is really important to me, right now, to work on in my life?
Example: Be productive.

Step 4. Identify a few goals related to this value.
ASK: What specific goals can I work on that will make this value part of my life?
Examples: Get a job where I can do something useful.
Be more active keeping up with important tasks at home.
Find a volunteer job that will use skills I already have.

Step 5. Choose one goal to work on now.
Do pros and cons, if necessary, to select a goal to work on now.
Example: Get a job where I can do something useful.

Step 6. Identify small action steps toward your goal.
ASK: What small steps can I take to get to my goal?
Examples: Visit places and look for job openings on the Internet in my area.
Submit applications for jobs at places I want to work.
Write résumé.
Check out benefits at places I might want to work.

Step 7. Take one action step now.
Example: Go on Internet and check for jobs in my area.

Build Mastery and Cope Ahead

### Build Mastery

1. Plan on doing at least one thing each day to build a sense of accomplishment.
   - Example: __________________________

2. Plan for success, not failure.
   - Do something difficult, but possible.

3. Gradually increase the difficulty over time.
   - If the first task is too difficult, do something a little easier next time.

4. Look for a challenge.
   - If the task is too easy, try something a little harder next time.

### Cope Ahead of Time with Difficult Situations

1. **Describe** the situation that is likely to prompt problem behavior.
   - Check the facts. Be specific in describing the situation.
   - Name the emotions and actions likely to interfere with using your skills.

2. **Decide** what coping or problem-solving skills you want to use in the situation.
   - Be specific. Write out in detail how you will cope with the situation and with your emotions and action urges.

3. **Imagine** the situation in your mind as vividly as possible.
   - Imagine yourself IN the situation NOW, not watching the situation.

4. **Rehearse in your mind** coping effectively.
   - Rehearse in your mind exactly what you can do to cope effectively.
   - Rehearse your actions, your thoughts, what you say, and how to say it.
   - Rehearse coping effectively with new problems that come up.
   - Rehearse coping effectively with your most feared catastrophe.

5. **Practice relaxation** after rehearsing.
EMOTION REGULATION HANDOUT 20
(Emotion Regulation Worksheets 9, 14)

Taking Care of Your Mind by Taking Care of Your Body

Remember these as PLEASE skills.

P - 1. Treat Physical Illness. Take care of your body. See a doctor when necessary. Take prescribed medication.

E - 2. Balance Eating. Don’t eat too much or too little. Eat regularly and mindfully throughout the day. Stay away from foods that make you feel overly emotional.

A - 3. Avoid Mood-Altering Substances. Stay off illicit drugs, and use alcohol in moderation (if at all).

S - 4. Balance Sleep. Try to get 7–9 hours of sleep a night, or at least the amount of sleep that helps you feel good. Keep to a consistent sleep schedule, especially if you are having difficulty sleeping.

E - 5. Get Exercise. Do some sort of exercise every day. Try to build up to 20 minutes of daily exercise.
# Nightmare Protocol, Step by Step

When Nightmares Keep You from Sleeping

## 1. Practice relaxation, pleasant imagery, and coping skills first, to be sure you are ready to work on changing your nightmares.

Do progressive relaxation, paced breathing, and/or Wise Mind exercises; listen to music or guided imagery; review the distress tolerance crisis survival skills.

## 2. Choose a recurring nightmare you would like to work on.

This will be your target nightmare. Select a nightmare you can manage now. Put off trauma nightmares until you are ready to work with them—or, if you target a trauma nightmare, skip Step 3.

## 3. Write down your target nightmare.

Include sensory descriptions (sights, smells, sounds, tastes, etc.). Also include any thoughts, feelings, and assumptions about yourself during the dream.

## 4. Choose a changed outcome for the nightmare.

The change should occur BEFORE anything traumatic or bad happens to you or others in the nightmare. Essentially, you want to come up with a change that will prevent the bad outcome of the usual nightmare from occurring. Write an ending that will give you a sense of peace when you wake up.

*Note: Changes in the nightmare can be very unusual and out of the ordinary (e.g., you might become a person with superhuman powers who is able to escape to safety or fight off attackers). Changed outcomes can include changed thoughts, feelings, or assumptions about yourself.*

## 5. Write down the full nightmare with the changes.

## 6. REHEARSE and RELAX each night before going to sleep.

Rehearse the *changed* nightmare by visualizing the entire dream with the changes each night, *before* practicing relaxation techniques.

## 7. REHEARSE and RELAX during the day.

Visualize the entire dream with the change, and practice relaxation as often as possible during the day.
Sleep Hygiene Protocol
When You Can’t Sleep, What to Do Instead of Ruminating

TO INCREASE THE LIKELIHOOD OF RESTFULNESS/SLEEP:
1. Develop and follow a consistent sleep schedule even on weekends. Go to bed and get up at the same times each day, and avoid anything longer than a 10-minute nap during the day.
2. Do not use your bed in the daytime for things like watching TV, talking on the phone, or reading.
3. Avoid caffeine, nicotine, alcohol, heavy meals, and exercise late in the day before going to sleep.
4. When prepared to sleep, turn off the light, and keep the room quiet and the temperature comfortable and relatively cool. Try an electric blanket if you are cold; putting your feet outside of the blanket or turning on a fan directed toward your bed if you are hot; or wearing a sleeping mask, using earplugs, or turning on a “white noise” machine if needed.
5. Give yourself half an hour to at most an hour to fall asleep. If it doesn’t work, evaluate whether you are calm, or anxious (even if only “background anxiety”), or ruminating.
6. DO NOT CATASTROPHIZE. Remind yourself that you need rest, and aim for reverie (i.e., dreaminess) and resting your brain. Sell yourself on the idea that staying awake is not a catastrophe. Do not decide to give up on sleeping for the night and get up for the “day.”

IF YOU ARE CALM BUT WIDE AWAKE:
7. Get out of bed; go to another room and read a book or do some other activity that will not wake you up further. As you begin to get tired and/or sleepy, go back to bed.
8. Try a light snack (e.g., an apple).

IF YOU ARE ANXIOUS OR RUMINATING
9. Use the cold water TIP skill. Get right back in bed and do the paced breathing TIP skill. (See Distress Tolerance Handout 6: TIP Skills: Changing Your Body Chemistry.) Remember, if you have any medical condition, get medical approval before using cold water.
10. Try the 9–0 meditation practice. Breathe in deeply and breathe out slowly, saying in your mind the number 9. On the next breath out, say 8; then say 7; and so on until you breathe out saying 0. Then start over, but this time start with 8 (instead of 9) as you breathe out, followed by 7, and so on until you reach 0. Next start with 6 as you breathe out, and so on to 0. Then start with 5, then with 4, and so on until you have gone all the way down to starting with 1. (If you get lost, start over with the last number you remember.) Continue until you fall asleep.
11. Focus on the bodily sensation of the rumination (rumination is often escape from difficult emotional sensations).
12. Reassure yourself that worries in the middle of the night are just “middle-of-the-night-thinking,” and that in the morning you will think and feel differently.
13. Read an emotionally engrossing novel for a few minutes until you feel somewhat tired. Then stop reading, close your eyes, and try to continue the novel in your head.
14. If rumination doesn’t stop, follow these guidelines: “If it’s solvable, solve it. If it is insolvable, go deep into the worry all the way to the “catastrophe”—the very worst outcome you can imagine—and then imagine coping ahead with the catastrophe.” (See Emotion Regulation Handout 19: Build Mastery and Cope Ahead.)

If nothing else works, with eyes closed, listen to public radio (BBC, NPR, etc.) at low volume (use headphones if necessary). Public radio is a good choice for this, because there is little fluctuation in voice tone or volume.
Handouts for Managing Really Difficult Emotions
Overview:
Managing Really Difficult Emotions

MINDFULNESS OF CURRENT EMOTIONS
Suppressing emotion increases suffering.

Mindfulness of current emotions is the path to emotional freedom.

MANAGING EXTREME EMOTIONS
Sometimes emotional arousal is so high that you can’t use any skills, particularly if the skills are complicated or take any thought on your part.

This is a skills breakdown point.

Crisis survival skills are needed.

TROUBLESHOOTING AND REVIEW
There are many ways to change emotions.

It can be helpful to have a list of the important skills to look at when you can’t remember the skills you need to regulate your emotions.
Mindfulness of Current Emotions:
Letting Go of Emotional Suffering

**OBSERVE YOUR EMOTION**

- Step back and just notice your emotion.
- Experience your emotion as a WAVE, coming and going.
- Now imagine surfing the emotion wave.
- Try not to BLOCK or SUPPRESS the emotion.
- Don’t try to GET RID of or PUSH away the emotion.
- Don’t try to KEEP the emotion around.
- Don’t HOLD ON to it.
- Don’t AMPLIFY it.

**PRACTICE MINDFULNESS OF BODY SENSATIONS**

- Notice WHERE in your body you are feeling emotional sensations.
- Experience the SENSATIONS as fully as you can.
- Observe how LONG it takes before the emotion goes down.

**REMEMBER: YOU ARE NOT YOUR EMOTION**

- Do not necessarily ACT on your emotion.
- Remember times when you have felt DIFFERENT.

**PRACTICE LOVING YOUR EMOTION**

- RESPECT your emotion.
- Do not JUDGE your emotion.
- Practice WILLINGNESS.
- Radically ACCEPT your emotion.
Managing Extreme Emotions

Follow these suggestions when emotional arousal is very **HIGH**—so extreme that your ability to use your skills breaks down.

First, observe and describe that you are at your **SKILLS BREAKDOWN POINT:**

- Your distress is extreme.
- You are overwhelmed.
- You cannot focus your mind on anything but the emotion itself.
- Your mind shuts down; your brain stops processing information.
- You cannot solve problems or use complicated skills.

**Now check the facts.** Are you really “falling apart” at this level of distress?

If no, **USE YOUR SKILLS.**

If yes, go to Step 1: You are at your **SKILLS BREAKDOWN POINT.**

**Step 1.** Use crisis survival skills to bring down your arousal:

(See Distress Tolerance Handouts 6–9a.)

- TIP your body chemistry.
- DISTRACT yourself from the emotional events.
- SELF-SOOTHE through the five senses.
- IMPROVE the moment you are in.

**Step 2.** Return to mindfulness of current emotions.

(See Emotion Regulation Handout 22.)

**Step 3.** Try other emotion regulation skills (if needed).
Troubleshooting Emotion Regulation Skills: When What You Are Doing Isn’t Working

CHECK YOUR BIOLOGICAL SENSITIVITY

1. **ASK**: Am I biologically more vulnerable?
   - Do I have untreated physical illness or distress?
   - Am I out of balance on eating, use of drugs, sleep, exercise?
   - Have I taken medications as prescribed?

2. **WORK** on your PLEASE skills.
   - 1. Take care of physical illness and distress.
   - 2. Take medications as prescribed. Check if others are needed.
   - 3. Try again.

CHECK YOUR SKILLS

1. **REVIEW** what you have tried.
   - Did you try a skill likely to be effective?
   - Did you follow the skill instructions to the letter?

2. **WORK** on your skills.
   - 1. Review and try other skills.
   - 2. Get coaching if you need it.
   - 3. Try again.

CHECK FOR REINFORCERS

1. **ASK**: Do my emotions . . .
   - COMMUNICATE an important message or influence people to do things?
   - MOTIVATE me to do things I think are important?
   - VALIDATE my beliefs or my identity?
   - FEEL GOOD?

2. **IF YES**:
   - 1. Practice interpersonal effectiveness skills to communicate.
   - 2. Work to find new reinforcers to motivate yourself.
   - 4. Do PROS AND CONS for changing emotions.
   - *(See Emotion Regulation Worksheet 1.)*

*(continued on next page)*
CHECK YOUR MOOD

- **ASK:** Am I putting in the time and effort that solving my problem will take?
- **IF NO:**
  1. Do PROS AND CONS for working hard on skills.
  2. Practice RADICAL ACCEPTANCE and WILLINGNESS skills.
  3. Practice the mindfulness skills of PARTICIPATING and EFFECTIVENESS
     *(See Mindfulness Handouts 4 and 5.)*

CHECK FOR EMOTIONAL OVERLOAD

- **ASK:** Am I too upset to use complicated skills?
- **IF YES, ask:** Can the problems I am worrying about be easily solved now?

Pros and Cons of Changing Emotions

Due Date: __________ Name: ____________________________ Week Starting: __________

EMOTION NAME: ___________________________ INTENSITY (0–100) Before: ____ After: ____

Fill this worksheet out when you are experiencing difficulties with:

• Trying to decide whether to work on changing ineffective emotions.
• Feeling willful/saying no to letting go of emotion mind.
• Deciding whether to work on reducing your emotional reactions to specific events.
• Feeling threatened whenever you think of letting go of emotions.
• Not in the mood for being effective.

When filling out this worksheet, think about these questions:

• Is living in emotion mind in your best interest (i.e., effective) or not in your best interest (i.e., ineffective)?
• Will refusing to regulate your own emotions create a new problem for you?
• Is reducing immediate high emotions likely to increase your freedom or decrease it?
• Is being attached to your emotions about a situation useful or not?
• Is working to reduce your emotion really too much work?

Make a list of the pros and cons of changing the emotion you are having difficulty with.

Make another list of the pros and cons of not changing your emotion.

What facts did I check out?
EMOTION REGULATION WORKSHEET 2A

(Emotion Regulation Handout 3)

Example: Figuring Out What My Emotions Are Doing for Me

Due Date: __________  Name: ___________________________________________  Week Starting: __________

Select a current or recent emotional reaction and fill out as much of this sheet as you can. If the prompting event for the emotion you are working on is another emotion that occurred first (for example, feeling afraid prompted getting angry at yourself), then fill out a second worksheet for that first emotion. Use the back of the sheet if necessary. Use describe skills for each question.

EMOTION NAME: ________________________________  INTENSITY (0–100): __________

Prompting Event
What happened to prompt this emotion?

I left my roommate's pot on the burner and forgot about it. I destroyed it. I then threw the pot away without telling my roommate.

Motivation to Action
What action was my emotion motivating and preparing me to do? (Was there a problem my emotion was getting me to solve, overcome, or avoid?) What function or goal did my emotion serve?

My emotion was motivating me to shrink away from my friend, to hide myself. It’s possible that the function was to get me to change that behavior. The emotion was also functioning to get me to try to hide that I destroyed the pot.

To influence my friend to stop being mad at me.

Communication to Others
What was my facial expression? Posture? Gestures? Words? Actions?

My eyes were looking down. My lips were turned down. I was slouched slightly and turned slightly away from my friend. I did not say anything. I put my hands on my forehead.

What message did my emotion send to others (even if I didn’t intend to send the message)?

I think my friend realized that I felt bad.

How did my emotion influence others (even if I didn’t intend to influence them)? What did others do or say as a result of my emotional expression or actions?

My friend tried to get me to talk. I think it influenced her to stop yelling at me and be more kind.

Communication to Myself
What did my emotion say to me?

It was wrong to do what I did. I feel badly about it because I disappointed my friend. I have really messed this up and now she will never trust or like me.

What facts could I check out to be sure the message my emotions were sending to me was correct?

I could ask myself if what I did would get me kicked out of my house/friendship. I could try to figure out if what I did crossed my own wise/clear mind, moral code, values. I could ask her:

Have I destroyed the relationship? Is she going to kick me out? Stop spending time with me? I could also ask what I can do that would help her to trust me again.

What facts did I check out?

I felt bad about burning the pot—but it wasn’t a moral code or values issue yet until I tried to hide that I had done it. That behavior did go against my Wise Mind. I asked my roommate if she hated me now and she said no. I asked if there was anything I could do to fix the situation, and she asked me to buy a new pot, and I did.

Worksheets for Changing Emotional Responses
Check the Facts

Due Date: _______ Name: ___________________ Week Starting: _______

It is hard to problem-solve an emotional situation if you don’t have your facts straight. You must know what the problem is before you can solve it. This worksheet helps you figure out whether it is the event that is causing your emotion, your interpretation of the event, or both. Use your mindfulness skills of observing and describing. Observe the facts, and then describe the facts you have observed.

Step 1
Ask: What emotion do I want to change?

EMOTION NAME: ______________ INTENSITY (0–100) Before: ____ After: ____

Step 2
Ask: What is the PROMPTING EVENT for my emotional reaction?

DESCRIBE THE PROMPTING EVENT: What happened that led you to have this emotion? Who did what to whom? What led up to what? What is it about this event that is a problem for you? Be very specific in your answers.

CHECK THE FACTS!
Look for extremes and judgments in the way you are describing the prompting event.

REWRITE the facts, if necessary, to be more accurate.

Step 3
Ask: What are my INTERPRETATIONS (thoughts, beliefs, etc.) about the facts?
What am I assuming? Am I adding my own interpretations to the description of the prompting event?

CHECK THE FACTS!
List as many other possible interpretations of the facts as you can.

REWRITE the facts, if necessary. Try to check the accuracy of your interpretations. If you can’t check the facts, write out a likely or a useful (i.e., effective) interpretation.

(continued on next page)
Step 4
Ask: Am I assuming a THREAT? What is the THREAT? What about this event or situation is threatening to me? What worrisome consequences or outcomes am I expecting?

CHECK THE FACTS!
List as many other possible outcomes as you can, given the facts.

REWRITE the facts if needed. Try to check the accuracy of your expectations. If you can’t check out probable outcomes, write out a likely noncatastrophic outcome to expect.

Step 5
Ask: What’s the CATASTROPHE, even if the outcome I am worrying about does occur? Describe in detail the worst outcome I can reasonably expect.

DESCRIBE WAYS TO COPE if the worst does happen.

Step 6
ASK: Does my emotion (or its intensity or duration) FIT THE FACTS?
(0 = not at all to 5 = I am certain): ______
If you are unsure whether your emotion or your emotional intensity fits the facts (for example, you give a score of 2, 3, or 4), keep checking the facts. Be as creative as you can be; ask others for their opinions; or do an experiment to see if your predictions or interpretations are correct.

Describe what you did to check the facts:
Figuring Out How to Change Unwanted Emotions

Due Date: __________ Name: ___________________________________________ Week Starting: __________

Once you have checked the facts, use this worksheet to help you figure out what to do next. Before you can figure out what to change, you have to decide whether acting on your emotion is effective in the situation you are in (and whether the emotion is one you actually want to change). (If you are not sure whether you want to change it or not, go back to Emotion Regulation Worksheet 1 and do pros and cons.) In the flow chart below, circle Yes or No at each level, and then select the skill that fits your situation best.

Describe what you did to manage the emotion:

Due Date: _________  Name: ___________________________  Week Starting: _______

Select a current or recent emotional reaction that you find painful or want to change. Figure out if the emotion fits the facts. If it does not, then notice your action urges; figure out what would be opposite actions; and then do the opposite actions. Remember to practice opposite action all the way. Describe what happened.

EMOTION NAME: __________________________  INTENSITY (0–100) Before: _____  After: _____

PROMPTING EVENT for my emotion (who, what, when, where): What prompted the emotion.

IS MY EMOTION (or its intensity or duration) JUSTIFIED? Does it fit the facts? Is it effective?

List the facts that justify the emotion and those that do not. Check the answer that is mostly correct.

ACTION URGES: What do I feel like doing or saying?

OPPOSITE ACTION: What are the actions opposite to my urges? What am I not doing because of my emotions? Describe both what and how to act opposite all the way in the situation.

WHAT I did: Describe in detail.

HOW I did it: Describe body language, facial expression, posture, gestures, and thoughts.

What AFTEREFFECT did the opposite action have on me (my state of mind, other emotions, behavior, thoughts, memory, body, etc.)?

EMOTION REGULATION WORKSHEET 11  
(Emotion Regulation Handouts 17, 18)

Getting from Values to Specific Action Steps

Due Date: __________  Name: __________________________________________  Week Starting: __________

STEP 1. AVOID AVOIDING. Rate degree you have avoided working on building a life worth living:
In the past (____) Now (____) (0 = no avoidance, 100 = avoided completely even thinking about it)
Check reasons for avoiding: □ Hopelessness □ Willfulness □ Too hard □ Other: __________

Use your cope-ahead skills, and write out a plan for getting yourself to avoid avoiding.

STEP 2. IDENTIFY VALUES THAT ARE IMPORTANT TO YOU. What is most important to you? Review Emotion Regulation Handout 18 for ideas. Make a list of several of your most important values.

**MY IMPORTANT VALUES:** __________________________________________

STEP 3. IDENTIFY ONE IMPORTANT LIFE VALUE OR PRIORITY TO WORK ON NOW.

Long-term goals depend on Wise Mind values and priorities. What values in your life need more work now?

Make a list of two of the most important values in your life that are important things for you to work on right now.

| VALUE: ____________________________ | Importance ( ) | Priority ( ) |
| VALUE: ____________________________ | Importance ( ) | Priority ( ) |

Rate the importance of each value for a “life worth living” to you (1 = a little important, 5 = extremely important). Then rate how important it is to work on this value NOW (1 = low priority, 5 = very high priority).

**REFINE YOUR CHOICES.** Review your list and ratings above and the value you have chosen to work on now. **CHECK THE FACTS.** Make sure that what you think are values and priorities are in fact YOUR values and priorities—not the values others have, the values others think you should have, or old internal “tapes” of values you learned but no longer really believe in. Rewrite your list if you need to.

**CHOOSE A VALUE TO WORK ON NOW.** Pick the value that is either the most important to you or is your highest priority to work on right now. (If you have more than one value that is a high priority to work on right now, fill out another worksheet for that value.)

**VALUE TO WORK ON NOW:** __________________________________________

(continued on next page)
STEP 4. IDENTIFY A FEW GOALS RELATED TO THIS VALUE.

List two or three different goals related to this value. Be specific. What can you do to make this value a part of your life? (If you have trouble thinking of goals, brainstorm as many goals as you can think of that might be related, and then choose those most related to your values.)

GOAL: ________________________________________________
GOAL: ________________________________________________
GOAL: ________________________________________________

STEP 5. CHOOSE ONE GOAL TO WORK ON NOW.

Select one goal that is reasonable to work on now. If one goal has to be accomplished before other goals can be worked on, choose that one as your working-on goal. Be specific. If you want to work on more than one goal at a time, fill out two worksheets.

Goal to work on: ________________________________________________

STEP 6. IDENTIFY SMALL ACTION STEPS TOWARD YOUR GOAL.

Break down the goal into lots of small steps that you can do. Each small step is a subgoal on the way to your overall goal. List action steps that will get you closer to your goal. If you can’t think of any steps, try brainstorming ideas. Write down whatever comes to your mind.

If you start to feel overwhelmed because a step looks too big, erase it and break it down into smaller steps you think you can actually do. Rewrite your list if you need to so that the steps you think you can do are included. Put in the order that you think you should do them. If you start to feel overwhelmed because there are too many steps, stop writing new steps and focus on just one step.

REMEMBER: ATTEND TO RELATIONSHIPS

Attending to relationships (Group A on Emotion Regulation Handout 18) and being part of a group (Group B) are important to just about everyone. If you did not choose a value from one of these groups, review them to see if one of these first 10 values is an important one for you to work on. If you choose one, write it down and then, after working on it, fill out the rest of the worksheet.
